Battery Back-Up Systems For Point of Sale (POS) Systems

KEEP YOUR BUSINESS RUNNING WITH A POS UPS

Power fluctuations—outages, brownouts, sags, and surges—can shut down your cash register or credit card machine at the worst possible time. A POS UPS (Uninterruptible Power Supply) protects your point-of-sale system, ensuring it stays up and running even when the power goes out. Don't let power problems cost you sales!

HOW A POS UPS PROTECTS YOUR BUSINESS

- Prevents Downtime: Keeps your POS operational during outages
- Conditions Power: Stabilizes voltage to extend your equipment's life
- Safe Shutdown: Allows proper system shutdown during extended power loss
- Data & Hardware Protection: Guards against data loss and hardware damage
- Cost & Time Savings: Reduces downtime-related losses

CHOOSE THE RIGHT POS UPS FOR YOUR NEEDS:

Our UPS solutions come in four tiers—designed to match the level of protection your business requires:
- Standby UPS: Basic protection against common power issues
- Line Interactive UPS: Enhanced protection for more frequent power fluctuations
- Double Conversion UPS: Superior defense covering nearly all power irregularities
- Double Conversion Isolated Online UPS: Premium isolation transformer for complete power problem protection

KEY QUESTIONS TO ASK WHEN SELECTING A POS UPS:

- Power Requirements: Check your POS system's wattage or volt-amp (VA) rating.
- Voltage Compatibility: Most systems operate on 120V; larger setups may require 208V or 240V.
- Plug & Receptacle Type: Ensure compatibility with standard 5-15R outlets and cords.
- Installation Location: Choose from floor, rack, or wall mounting based on your setup.
- Runtime Needs: Determine if you need a UPS that lasts 5 minutes, 30 minutes, or longer.
- Protection Level: Decide between basic Standby protection or advanced options like Line Interactive or Double Conversion.
- Monitoring & Communications: Benefit from built-in monitoring software to keep an eye on system performance.
