

XTREME POWER CONVERSION **JX-200** // NXT Integrity 120VA (Model NPT120-N) COMPARISON

Both products are transformer-based power conditioners designed to protect sensitive electronics from electrical noise, spikes, and transients. The JX-200 provides higher capacity in a dramatically lower-profile enclosure, enabling installs where vertical clearance is limited.

Power Conditioner Feature Comparison

Feature	Xtreme Power Conversion JX-200	NXT Power Solutions Integrity 120VA (NPT120-N)	JX-200 Advantage
Transformer Technology	Toroidal isolation transformer	E-I isolation transformer	Smaller, lighter transformer design
Rated Capacity	200 VA	120 VA	Higher supported load
Input / Output Voltage	120 VAC	120 VAC	Equivalent
Surge & Noise Protection	Surge suppression and noise filtering	Surge diversion and noise filtering	Equivalent
Form Factor / Mounting	Wall, rack, counter, under-counter (included)	Tabletop; wall-mount available	Mounting hardware included
Height	1.25"	4.3"	Ultra-low-profile design for tight spaces
Certifications	UL, cUL, RoHS	UL, cUL, RoHS	Equivalent
Warranty	5 years	5 years	Equivalent
