

## XTREME POWER CONVERSION **S71-1500** // APC **BRG1500G** COMPARISON

Both UPS systems provide line-interactive power protection, LCD monitoring, automatic voltage regulation, and user-replaceable VRLA batteries. However, the Xtreme Power S71-1500 stands out with its TAA-compliant design, making it approved for U.S. government, military, and public-sector procurement—an eligibility advantage the APC BR1500G does not offer.
