XTREME POWER CONVERSION **P80-2200** // TRIPP LITE **SMART2200RMXL2U** COMPARISON

The Xtreme Power P80 is a high-performance line-interactive UPS designed for professional IT, network, and commercial environments where efficiency, reliability, and flexible installation are required. The P80 family is available in 120V models from 800VA to 3000VA, with 208V models in 3kVA and 5kVA, offering broader deployment flexibility than typical rack-only UPS systems.

UPS COMPARISON

Feature	Xtreme Power P80-2200	Tripp Lite SMART2200RMXL2U	P80 Advantage
Capacity	2200VA / 2000W	2200VA / 1920W (1600W with EBP)	Higher wattage, no derating when extended batteries are added
Topology	Line Interactive with AVR, sinewave output	Line Interactive with AVR, sinewave output	Equivalent topology and output quality
Form Factor / Mounting	Tower included; optional 2U rack or wall mount	2U rack standard; optional tower or wall mount	Comparable mounting flexibility
